

1a) `perldoc -f chomp`

b) `perl -help`

c) `perl -V:uname`

d) `perldoc -V $_`

e) `perl -help`

2a) The command prints out a randomized string of letters of length 8, utilizing the map function.

```
perl -le "print map{('0'..'9','?', '!', '-', ';', ':', '#',  
'$', '%', 'a'..'z', 'A'..'Z')[rand 52]} 1..12"
```

```
b) print join " ", sort {$b <=> $a} grep{$_ % 2 == 1} split /:/,  
"1:3:4:5:71:8:9";
```
